

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

The present volume contains a Catalogue of all the Books now belonging to the Library of the Free Academy. Those named in the Appendix have been added to the Library since this volume was prepared, and while passing through the press, making it complete to January 1, 1861.

In 1852, EPHRAIM HOLBROOK, Esq., of this city, bequeathed the sum of \$5,000 to be applied, at a future period, to the purchase of books for the Library. Nothing has been received from this fund.

In 1857, SETH GROSVENOR, Esq., of this city, also bequeathed to the Board of Education the sum of \$30,000, to be permanently invested, and the income thereof to be expended, under certain conditions, in the purchase of books for the Library of the Free Academy. The income from this fund will soon be made available.

The Library contains between eight and nine thousand volumes, and is rapidly increasing.

A few books have been donated, and a small appropriation was made by the Board of Education when the Library was first opened; other than this, the books have been purchased from the funds appropriated by the State, from the Literature Fund.

In arranging the catalogue, the Librarian had in view ease and certainty of reference, and he believes that little, if any, trouble will be experienced in ascertaining what books are in the Library, and where they are to be found. The greatest care has been exercised, also, in making it as complete and correct as possible; and that few errors will be found, other than those of a typographical character, or those owing to the constant circulation of the books, while preparing the catalogue. It is hoped, however, that it will be found a complete key for unlocking the rich treasures of the Library.

OF THE
BOARD OF EDUCATION,

§ 51. In cases of gross carelessness, or wanton injury of the books, punishment shall be inflicted in addition to reparation.

§ 52. The Librarian shall report to the Executive Committee, at the end of each Term, the condition of the Library, the books injured or lost, and the persons by whom they were lost or injured.

☞ Catalogues of the Library may be obtained by applying to the Librarian.
